# Magniscreen® | Commercial / Public-Use System

*The appearance and functionality of Magniscreen, adapted for situations where the screen must remain permanently secured.*

### Secured & Fixed
The screen is semi-permanently fixed to the window frame with screws.

### Window Still Opens
Lower panel is hinged, allowing the window to open and close while the screen remains in place.

### Magnetic Closure
Magnets hold the lower panel firmly in place when closed.

### Built for Public & Commercial Environments
Ideal for lodges, hotels, hospitals, mines, schools and other high-traffic areas.

### Maintains the Magniscreen Look & Quality
Clean, unobtrusive and stylish – with the added security for your environment.

MAGNISCREEN™
INSECT SCREENS

Keeps insects out | Improves ventilation | Clear, unobtrusive appearance | Durable & long-lasting

## ALSO SUITABLE WHERE MONKEYS & OTHER ANIMALS ARE A CONCERN

Where monkeys or other animals may push screens held only by magnets off the window, this screw-fixed system adds security to the main frame. The lower hinged panel remains magnetically closed. It is not a guaranteed animal-proof barrier.
